Marks:

G – plants traditionally planted in greenhouse

BOTANICAL GARDEN of FACULTY of SCIENCE, MASARYK UNIVERSITY

The Botanical Garden of Faculty of Science, Masaryk University – Brno, was founded in 1922 by Professor Josef Podpěra. The garden has continued to grow and develop since that time. In 1995–96 during reconstruction of the garden, new greenhouses was made. At the present time we have a collection of about 4000 taxa, 1850 taxa in greenhouses and 2200 taxa outdoors.

1. The outdoor plant collection includes the Plant System (0.3 ha) in front of the greenhouses. In the Plant System a variety of species are shown by families; 85 families and 1500 species of vascular plants are grown here.
2. You can see samples of South Moravian vegetation and flora as follows: alluvian meadows and forests, oak and oak-hornbeam forests, non-forest xerothermophilous vegetation on limestone, serpentine or loess, submontane beech and spruce forests and sand dune flora. The area of this part is 0.4 ha. You can admire trees and shrubs from the temperate zone of Japan and China, Caucasus and Siberia, or from the Balkans and the Mediterranean. The rockeries contain montane and subalpine species from the high mountains of Europe and North America.
3. The new greenhouses are a system of five tunnel-like structures with the largest one situated in the middle (max. height 10.5 m, area 1,200 m²). The greenhouses cover is a double layer of polyacrylamide.

The greenhouses contain:

- Tropical collection with *Victoria cruziana*
- Collection of ferns and cycads
- Subtropical collection with evergreen shrubs and trees, with *Wollemia nobilis*
- Collections of Bromeliaceae, Cactaceae and other succulents
- Grow greenhouse.

The botanical garden is open daily from 9 a. m. to 5 p. m., only to 3 p. m. in winter. Entrance fee are for greenhouses.

The garden:

Latitude: 49°12'15''

Longitude: 16°35'50''

CONDITIONS

In response to the Convention of Biological Diversity (Rio de Janeiro 1992), the seeds are offered for a use in the fields of research, education and development of public botanical gardens. The commercialisation of the seeds, of the resulting plants or of their genetic material is strictly forbidden. Any scientific publication

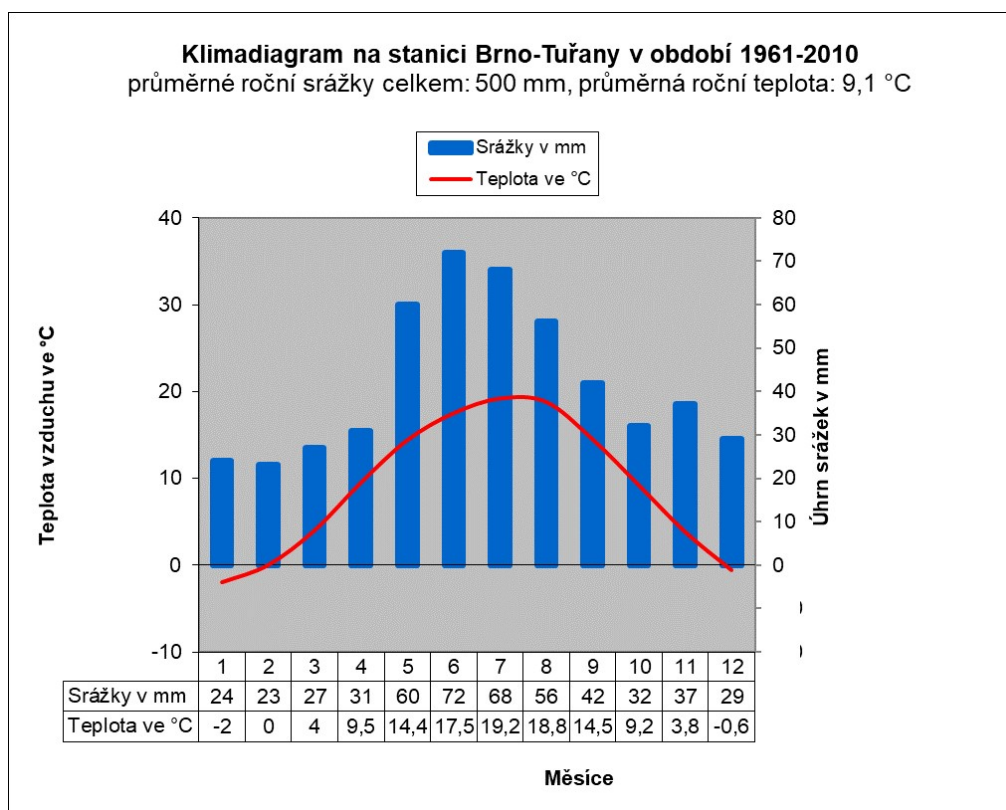

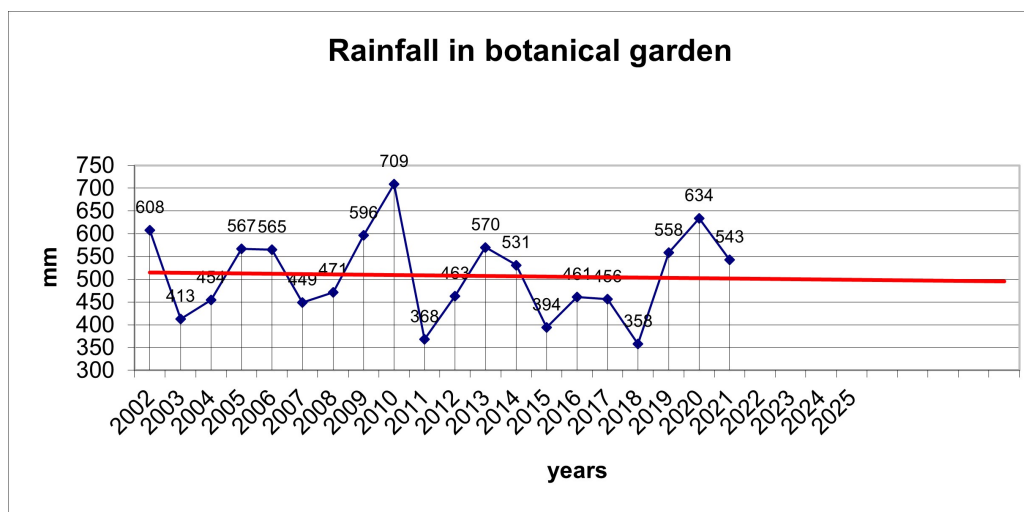

resulting of the use of this material must mention in the acknowledgements the Botanical Garden of Faculty of Science, Masaryk University in Brno.

We are an IPEN Member, code BRNU. Order seeds, you agree to comply with the above conditions. We are registered on CZ 003 Register of scientific institutions entitled to the exemption provided by Article VII, paragraph 6, of the Convention www.cites.org/common/reg/si/si-CZ.pdf.

GEOGRAPHIC AND CLIMATIC INFORMATION

Botanical garden is located near the Brno city centre at approximately 240 m s. m. It's coordinates are 49°12'15" (latitude) and 16°35'50" (longitude). Information on annual precipitation from 2002 to 2021 and on mean monthly and yearly temperature and rainfall from 1961 to 2010 can be found in enclosed climographs.

Rainfall in the garden 2002 – 2021 in mm
