ORBIS GEOGRAPHICUS BOHEMO-MORAVICUS 1994

Antonín VAISHAR

There were many personal changes in Bohemian and Moravian geography within the last five years. It is therefore a bit more complicated namely for foreign partners to see their way in these changes. This fact led to publication of the list of addresses of the Bohemian and Moravian geographers, one version of such a list having been issued in *SBORNÍK ČESKÉ GEOGRAFICKÉ SPOLEČNOSTI* (Proceedings of the Czech Geographical Society) on the occasion of IGU Regional Conference held in Prague. Due to the lacking space, however, only a list of the most significant geographical workplaces could be published, possibly also workplaces at which geographers' activities become more visible. Similar situation can be seen in Slovakia where a list of the most important geographical workplaces has been issued by the Department of Geography, Paedagogical University, Nitra (V. DRGOŇA ed.: Slovak Academic Geographical Institutions).

Our list presents Czech and Moravian geographers in alphabetical order, including those who individually often work at non-geographical workplaces as well as those who have already retired but still are active in geography. It will thus facilitate good orientation in present working places of individual colleagues. It is quite natural that not all of the contacts have been maintained. Some of the geographers do not even wish to be included in the list, which they have expressed by not having answered our polite request for topical data.

The list is based on geographers working at geographical institutions of universities in the Czech Republic and in the Institute of Geonics, Czech Academy of Sciences. This fundamental list can be considered complete and institutionally authorized. Contacted were also some non-academic workplaces which employ geographers. Individual institutions were given a chance of notifying ORBIS authors of experts who had left and to indicate their new workplaces. Another source of information was *ORBIS GEOGRAPHICUS BOHEMOSLOVACUS*, which was published in the journal *ZPRÁVY GEOGRAFICKÉHO ÚSTAVU* (News from Geographical Institute), Czechoslovak Academy of Sciences, No. 2/1991. All geographers mentioned there were contacted so that we could verify their present workplaces. The rest of information has been completed on the basis of personal contacts of MGR editorial staff and some other geographers. Here we feel obliged to express our gratitude to our prominent historical geographer, Dr. TRÁVNÍČEK.

ORBIS GEOGRAPHICUS BOHEMO-MORAVICUS includes geographers working at universities, at scientific research run by Academy of Sciences, and those working in other national and private institutes and companies as well as in central institutions and their affiliations, exceptionally also private natural persons. The list does not include secondary school teachers who amount to several hundreds in the Czech Republic, neither does it include structure of the Czech Geographical Society, which was presented in its Proceedings mentioned above. The material is equipped with addresses and contact data for geographical workplaces at universities and in the Czech Academy of Sciences.

Structure of the entry is as follows:

Name and surname inclusive all academic and scientific titles and ranks in original Czech form which is recommended for correspondence. However, the names are being listed according to English alphabet. Surnames are presented in capital letters, female ones usually ending with -ová or -á.

Institution and workplace address: Name of the workplace is in English so that it can be identified by overseas readers (official translation is not available for all institutions,

however), address is presented in Czech official form in the order: zip code, town, street, number. Home addresses are presented for retired geographers (if available).

Line of specialization is coded according to the list of specializations enclosed.

Date of birth - day-month-year-place (in the case that the data are available).

University and the date of graduation if known.

Academic and scientific titles and ranks, year of their acquirement (see explanatory notes).

It was originally planned to also include functions in national and international geographical organizations and editorial boards. However, as the data available were of non-uniform character, it has been decided not to include them.

LIST OF TOPICAL SPECIALISATIONS

- 10 Physical Geography, Landscape
- 11 Geomorphology
- 12 Soils Geography
- 13 Climatology, Climate Geography
- 14 Hydrology, Hydrogeography
- 15 Biogeography
- 16 Karst Geography
- 17 Geology
- 20 Human Geography
- 21 Population Geography, Geodemography
- 22 Geography of Settlements and Dwelling
- 23 Agricultural Geography
- 24 Manufacturing Geography
- 25 Transportation Geography
- 26 Recreational Geography
- 27 Marketing and Services Geography
- 30 Cartography
- 35 Mathematical Methods, Statistics
- 36 Remote Sensing
- 37 Geographic Information Systems
- 40 Regional Geography
- 41 Regional Geography of the Czech Republic
- 42 Regional Geography of Foreign Countries
- 43 Regional Economy
- 45 Regional and Urban Planning
- 50 Environmental Geography, Geoecology
- 60 Theoretical Geography
- 65 Historical Geography, History of Geography
- 66 Political Geography
- 67 Medical Geography
- 70 Teaching Techniques in Geography

Structure of the issue on an individual is as follows:

- first name and surname including titles¹,
- address of the workplace,
- specialisation code (see list of topical specialisations),
- date and place of birth,
- completed university², acquired scientific and pedagogic ranks, year and place of their acquirement,
- position at work.
