THE 90th BIRTHDAY ANNIVERSARY OF DR. JAROSLAV LINHART 66

(Devadesátiny RNDr. Jaroslava Linharta, CSc.)

The 90th Birthday Anniversary of dr. Jaroslav LINHART

Mojmír HRÁDEK

Dr. Jaroslav LINHART at the meeting organized by the Branch Office of Institute of Geonics, CR Academy of Sciences. In the background, a picture of his teacher and later on also liberator from totalitarian work engagement - Prof. František VITÁSEK.

Emeritus scientific worker of the former Geographical Institute, CR Academy of Sciences, Brno - dr. J. LINHART celebrated his 90th birthday anniversary in full freshness of spirit on 4 March 1996.

An informal meeting with dr. LINHART on the occasion of this wonderful life anniversary was organized by the Brno Branch Office of Institute of Geonics Ostrava, CR Academy of Sciences jointly with the Brno group of Czech Geomorphological Committee. Younger colleagues could learn many interesting things about initial stages of systematic geomorphological research in Moravia.

In the course of the 50's, dr. LINHART and his family were politically persecuted by the Communist regime. Dr. LINHART mentioned that he is much obliged to Professor František VITÁSEK for his own come back to scientific work at the Academy of Sciences, who asked for dr. LINHART's assistance when being forced to manual work. Unusual scientific recognition was extended to dr. LINHART for his research of bank abrasion of dams. In 1964 he was invited by organizers

to the XXth international congress IGU in London in order to present a paper about regularities of abrasion development of dam banks. The then Czechoslovak political and geographical authorities would have never given him the chance.

The meeting with the doyen of Czech geomorphologists was a rare experience for all participants who highly appreciated the results of scientific work, absorbing narration and personal charms of this modest research scientist.
